

Poly-Ethylene Speed Humps

Heavy Duty Type

Access Technologies supplies modular poly-ethylene speed humps. Poly-ethylene is a strong and highly wear-resistant material that is UV-stabilised for use in Australian conditions

Check out these great product features:

- Designed for heavy duty use with trucks and other heavy vehicles—including B-doubles.
- Modular design—Sections are 360mm wide x 250mm long.
- UV Stabilised—Designed for a minimum of 5 years use without fading.
- Complies with Australian standard AS2890.1:2004.
- Alternating yellow and black colours for safety.
- Built-in prismatic reflector for night-time use.
- Fixings supplied for either concrete or asphalt.
- Low noise design for use near hospitals and residential areas.
- Rugged construction—suitable for high traffic flow rates.
